Class Format:

Designed with attendees in mind, classes are conducted in our state-of-the-art training facility supplied with the latest tools and equipment for hands-on learning. Our well-appointed classroom is the ideal environment for effective, thorough coverage and discussion of the training material. Instruction is conducted by our training and technical staff; when schedules allow, leading industry manufacturers representatives will share valuable information and answer your questions.

Class sizes are small, providing a tailor-made educational experience which prepares the student, regardless of experience level, to be a more productive refinish technician.

For both the classroom lecture and hands-on training, casual dress is appropriate.

What is included at No Cost:

- **Training Class**
- **Materials, Equipment**
- **Lunch** (on-site), **Dinner** (local restaurant)
- **Local transportation**
- **Personal protective equipment**
 (which *must* be used by every student)

How to Enroll:

1. Contact your Pro-Spray representative as soon as possible to advise of your intention to attend.
2. Once class availability is confirmed, complete the Training Enrollment Form provided (see back cover).
 Mail to above address - Attn: Pro-Spray Training or FAX to 1-330-830-6005 - Attn: Pro-Spray Training
3. You will receive a Training Enrollment Acknowledgement mailing that includes additional information.
4. Upon receiving mailing with enrollment confirmation, secure your travel and lodging arrangements.

All classes are two full days. Times indicated below; please arrange travel and lodging accordingly.

Day 1 8:30 am - 5:00 pm
Day 2 8:30 am - 4:00 pm

NOTE: Classes fill up quickly. Contact your Pro-Spray representative to confirm availability.

Distributor Product Training

Length: 2 full days
Description: This class provides basic paint knowledge and an overview of the entire Pro-Spray product offering, through both classroom and hands-on demonstration. Students will learn how each product is positioned in the collision repair facility and how to maximize the complete Pro-Spray system.

January 7 & January 8
 February 24 & February 25
 March 31 & April 1
 May 12 & May 13

Painter Certification for Waterborne/Low VOC

Length: 2 full days
Description: This class provides emphasis on H2O waterborne basecoat. Training also qualifies the painter for compliance to the new national emissions standard for HAPS and EPA 40 CFR Part 63 Subpart HHHHHH as well as Pro-Spray Warranty Certification. Students will learn about waterborne technology and the different techniques for waterborne refinishing. Spray equipment, environmental conditions and proper handling of chemicals will be discussed. This class involves both hands-on and classroom instruction.

January 14 & January 15
 April 14 & April 15
 May 19 & May 20

Painter Certification for National Rule

Length: 2 full days
Description: This class qualifies the painter for compliance to the new national emissions standards for HAPS. Training for EPA 40 CFR Part 63 Subpart HHHHHH as well as Pro-Spray Warranty Certification will be addressed. Both classroom and hands-on training are utilized for an in-depth look at the proper use of spray equipment, paint booth operation and product usage. Students will learn how to maximize productivity and efficiencies on repairs they face on a daily basis.

January 21 & January 22
 March 3 & March 4
 April 21 & April 22
 June 2 & June 3

Colour Theory and Adjustment

Length: 2 days
Description: This class is designed for the Pro-Spray technician wanting a comprehensive education in colour theory and adjustment for blending. Students will learn about pigments, colour formulation, variant descriptions and the differences in OE production colours. Participants will leave with an understanding of how to achieve an acceptable match in the shortest amount of time. Both solvent and waterborne colours are covered.

February 10 & February 11
 March 17 & March 18
 May 5 & May 6
 June 16 & June 17
